NAIROBI, 9–11 NOVEMBER 2016

EEPC India invites participation

East African region but also among the top economies in the continent. Kenya is a member-state of the Common Market for Eastern and Southern Africa (COMESA) and the East African Community (EAC).

Economy

Kenya's growth is projected to rise to 5.9% in 2016 and 6.1% in 2017. The positive outlook is predicated on infrastructure investments. The economy has seen much expansion, in Pharmaceuticals, Food processing, Tourism, Higher Education, Telecommunications, and Agricultural. The Kenyan economy has seen tremendous growth in the services sector, boosted by rapid expansion in telecommunication and financial activity over the last decade.

Fiscal consolidation is expected to ease pressure on domestic interest rates and increase credit uptake by the private sector. The contraction in the current account deficit will continue to be supported by declining commodity prices and rising exports of tea.

Industrial activity, concentrated around the three largest urban centres, Nairobi, Mombasa and Kisumu, is dominated by Pharmaceutical machinery, Agricultural machinery and Food Processing industries such as grain milling, beer production, and sugarcane crushing, and the fabrication of consumer goods.

Kenya, the gateway to East African market, is one of the fastest growing markets in the world and attracts thousands of buyers and decision makers from all levels and sectors.

About Kenya

Kenya is one of the dominant economies in the East Africa region and the fourth largest of the continent in terms of GDP. It is the financial and communication hub, not only of the
